

*Peter Rudolph*

# ***Fundamentals and practical steps of mc-silicon ingot crystallization***

1. Introduction
2. Basic consideration
  - 2.1 *Heat and mass transport*
  - 2.2 *Latent heat mastering*
  - 2.3 *Nucleation*
  - 2.4 *Second phase incorporation*
  - 2.5 *Grain growth kinetics*
  - 2.6 *Dislocation dynamics*
  - 2.7 *Cooling effects*
3. Technological tasks
4. Summary
